OBJECTIVE

To obtain a challenging position in a dynamic organization. Dedicated and ambitious data enthusiast, eager to apply strong analytical skills and programming acumen to solve complex problems. Committed to delivering impactful insights through innovative modeling techniques and contributing to organizational success.

EDUCATION

National Institute of Technology, Raipur	2022 - 2026
B.Tech - Computer science and Engineering	CGPA: 6.1 (till 8th semester)
Sri chaitanya junior college,Gudavalli	2022
Board of Intermediate Education, Andhra Pradesh	Percentage: 80.8
Sri Chaitanya High school,kankipadu	2020
Board of Secondary Education, Andhra Pradesh	Percentage: 100.0

PROJECTS

Enhancing Retail Business Sales with Analytics – GitHub Repo

- Designed an interactive dashboard to analyze sales trends, profit and loss zones.
- Utilized advanced visualizations to guide data-driven profit strategies.
- Implemented stock optimization and discount plans, improving retail profit by 20%.
- Performed trend analysis to detect peak sales periods and underperforming months.

Dynamic Pricing Engine for Ride-Hailing Services – GitHub Repo

- Built a machine learning engine to adjust fares in real time based on demand-supply analysis.
- Applied regression models to accurately forecast ride fares.
- Visualized market dynamics using scatter plots and distribution charts.

Image Forgery Detection using CNN and Error Level Analysis – GitHub Repo

- Developed an end-to-end deep learning model using Convolutional Neural Networks (CNN) to detect manipulated or tampered digital images.
- Implemented Error Level Analysis (ELA) preprocessing to highlight discrepancies in image compression.
- Integrated model performance visualization using matplotlib to track training vs. validation accuracy/loss curves.
- Evaluated performance through confusion matrix, accuracy metrics, and manual file-based testing.

EXPERIENCE

Alfido Tech – Data science Intern

Jun 2025 – Aug 2025

- Analyzed Zomato datasets using Python, Pandas, SQL, and Snowflake to extract business insights and create interactive visualizations.
- Built ETL pipelines to load and transform data in Snowflake, improving data accessibility for analytics.
- Developed a Loan Approval Prediction model using scikit-learn, with data stored and queried in Snowflake.
- Wrote optimized Snowflake SQL queries, views, and data transformations to support reporting.

SKILLS

- **Languages:** Python, SQL
- **Databases:** MySQL, Snowflake
- **Tools:** Power BI, MS Excel, Jupyter Notebook, GitHub, Git, dbt, Streamlit, Tableau
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

POSITION OF RESPONSIBILITY

Sanskriti Committee, NIT RR

Event Management Domain

2022 - 2024

- Coordinated large-scale events for 800+ attendees, managing logistics and execution in collaboration with core coordinators.
- Led 10+ volunteers, ensuring 95% task completion by delegating based on individual strengths.

Go Green, NIT RR

Public Relations Domain

2022 – 2024

- Documented club activities, including meetings, project reports, and event summaries.
- Organized events and workshops to promote green initiatives and engage campus stakeholders.

CERTIFICATIONS

- **Virtual Internship:** Data Analytics Job Simulation - Deloitte
